Physiology Research Project

During this block each of you will choose a health related topic to research, write about and present to the class. Sources for your research could be talking with your doctor, contacting an organization involved with your topic, finding books at the library and asking me for information. If you cannot find ample material using these sources, have your parent call me.

Project Description:

1. At least two different sources of information
2. A written summary of your research. The length of your paper/summary should be somewhere between 2-4 pages. This summary will be copied for inclusion in all main lesson books. Therefore, your paper must be proofread and neatly written.
3. A Poster designed by you about your topic (It can be anywhere from Bristol board size to regular poster board size)
4. 5-10 minute Oral presentation on your subject

Physiology Research Topics

Smoking (cigarettes, cigars, pipes, chewing tobacco)
Drinking and Alcoholism
Illegal Drug use and addiction (heroin, cocaine, marijuana)
Eating disorders (binge eating, bulimia, anorexia)
Depression (bi-polar disorder)
HIV-AIDS
Steroid use
Attention deficit Disorder/ Attention Deficit and Hyperactivity Disorder
Skin cancer/sun exposure
Hepatitis (A,B,C)
Bullying
Other? (Come talk to me if you have another idea)

Project Timeline

Sept. 13 (Wed.) Decide on topic of choice and tell Mrs. Langley
Sept. 20 (Mon.) Poster due
Sept. 26 (Tues) Paper due
Oct. 2-6 oral reports will be presented
